

Hexagon Coupler Nut

Hexagon Coupling Nut also known as an Extension Nut, used for joining two male threads, usually threaded bar/studding but also used on piping. The hexagon shape to the outer of the nut allows for tightening with a spanner /wrench. Sold in various lengths dependent on the application requirements.

| d | thread pitch | s | e |
|------------|--------------|----|------|
| M6 | 1.00 | 10 | 11.1 |
| M8 | 1.25 | 13 | 15.0 |
| M10 | 1.50 | 17 | 19.6 |
| M12 | 1.75 | 19 | 21.9 |
| M16 | 2.00 | 24 | 27.7 |
| M20 | 2.50 | 30 | 34.6 |
| M24 | 3.00 | 36 | 41.6 |
| M30 | 3.50 | 46 | 53.1 |
