Westfield Fasteners Product Specification:

Metric Connector Bolts

This product guide contains the specification for metric threaded connector bolts, a series of standard parts available from Westfield Fasteners.

Product Description

Connector bolts, also known as furniture bolts are generally used with connector caps, barrel nuts and Tee nuts. Designed to connect panels when constructing cabinets and flat pack furniture. The bolts have a wide low profile head, which spreads the load on the panel and gives a decorative detail to the joint.

Material

These connector bolts are manufactured in steel with a number of decorative coatings, including black, bronze and nickel.
